Education

PhD **Technische Universität Dresden, Germany**, Medical Imaging — Apr 2011 – Jan 2015
- attenuation correction in PET/MR
- summa cum laude

MSC **Technische Universität Dresden, Germany**, Physics — Sept 2005 – Jan 2011
- simulation of neutron capture and photon scattering
- among the top 5 of the graduates of the faculty of science in 2011

Experience

KU Leuven, Assistant Professor of Molecular Image Reconstruction and Analysis — Leuven, Belgium; Sept 2023 – present; 2 years 11 months
- leading a research group focused on the development of novel methods for improved image reconstruction and analysis in molecular imaging
- development of tools for the analysis of molecular imaging data and the translation of these tools into clinical practice

Stanford University, Instructor — Stanford, USA; Aug 2022 – July 2023; 1 year
- instructor in the lab of Prof. Fernando Boada focussing on anatomy-guided sodium MRI reconstruction

KU Leuven, Postdoctoral Researcher — Leuven, Belgium; Apr 2015 – July 2022; 7 years 4 months
- PostDoc in the lab of Prof. Johan Nuyts focussing on the development of novel methods for image reconstruction and analysis in PET (e.g. structure-guided PET reconstruction)

Awards & Honors

- 2026, CCP SyneRBI a honorary award for contributions to the community on open source software as well as education and training on AI aspects
- 2026, Winner of the 2nd PET reconstruction challenge (PETRIC2) by SyneRBI
- 2025, Runner-up of the ultra low dose PET denoising challenge
- 2024, Winner of the PET reconstruction challenge (PETRIC) by SyneRBI
- 2014, PhD award of Helmholtz-Zentrum Dresden-Rossendorf
- 2014, Award for notable achievements in nuclear medicine from German Society of Nuclear Medicine
- 2011, Ehrenfried Walter von Tschirnhaus Prize from TU Dresden

Service to the scientific community

- Associate Editor, *EJNM Physics* (2020–2026)
- Editorial Board member, *Physics in Medicine & Biology* (2026–present)
- Topic Convenor, *IEEE Medical Imaging Conference (MIC)* (2026)

Skills & Interests

- Physics in Nuclear Medicine - modeling of photon interactions, detector physics, PET, SPECT
- Applied Mathematics - inverse problems, image reconstruction, large-scale optimization, machine learning
- Scientific Computing - high performance computing, software design, software project management

Spoken Languages

- German - native
- English - fluent
- Dutch - fluent
